■ LEP Progressive Lubrication Pump Unit

✧ Product Description

LUBElite™ progressive pump unit is a kind of low-cost but high-quality pump unit which is being used in construction machinery, on-road machine, machine tool and general machinery widely.

This pump unit has a max. operating pressure of 350 bar. Hence, the applicable lubricant viscosity can be as high as NLGI 2 grease.

Each lubrication pump can have up to 6 pump elements installed simultaneously, forming 6 separate progressive lubrication systems.

✧ Product Features

1. Strong and stable power: BLDC motor or AC motor.
2. Suitable for harsh working conditions: maximum working pressure up to 350 bar.
3. Higher protection class: IP 66.
4. High-performance plastics plus die-cast aluminum alloy pump body: reduces overall weight but increases the pump strength.
5. The wider temperature tolerance range improves the pump's operating capability.

✧ Technical Data

Power Supply	DC 24 V	AC 230V/50 Hz	AC 380V/50 Hz
Rated Power	< 100 W		0.37 kW
Power Socket	DIN 43650 A		Wiring connection
IP Class	IP 66		IP 55
Pump Element Mounting Port	6 outlets, M20x1.5		
Working Pressure	Max. 350 bar		
Tank Capacity	2, 4, 6, 8, 10 L		
Refilling Port	DIN 71412 A and/or top lid		
Lubricant	NLGI 0, 1, 2		
Working Temperature	-41 °C ~ +70 °C		
Mounting	Vertical		

■ LEP Progressive Lubrication Pump Part Number

LEP21 2 T GL CH A0 D24 - 000020 / 000010 R

LUBElite 21 series pump station

Tank capacity
1: 2L 2: 4L 2P: 6L 3: 8L 10: 10L

Top lid
Blank: No T: Yes

Low level alarm
GL: DC 24V, PNP NC GN: No

Controller type [1)]
C0: No controller integrated
CH: Controller integrated, unit of interval time is Hour
CM: Controller integrated, unit of interval time is Minute

Signal and cable code
Refer to below table

Power supply
D24: DC 24V, power socket (DIN 43650A)
D24V: DC 24V, power socket (DIN 43650A), with 5m cable
A23: AC 230V / 50Hz, power socket (DIN 43650A)
A23V: AC 230V / 50Hz, power socket (DIN 43650A), with 5m cable
A38: AC 380V / 50Hz, cable gland
A38V: AC 380V / 50Hz, cable gland, with 5m cable

Pump element [2) 3)]
0: No 1: 3.3 cm^3/min 2: 6.0 cm^3/min A: 1.3 ~ 6.2 cm^3/min adjustable

Safety valve [2)]
0: No
1: Safety valve installed with ferrule connector of Ø6
2: Safety valve installed with ferrule connector of Ø8
3: Safety valve installed with ferrule connector of Ø10

Safety valve with grease return function [4)]
Blank: No R: Yes

1) When selecting “A38” power supply, only “C0” is valid.
2) The sequence is counterclockwise based on the pump top view.
3) When selecting “A” as pump element, then only “0” of safety valve is valid.
4) When selecting the grease return function, only 5 pump elements can be installed at most.

Signal and cable code explanation

The external signal cable kit has two options and they are mutually exclusive. All external signal cables are 5m length.

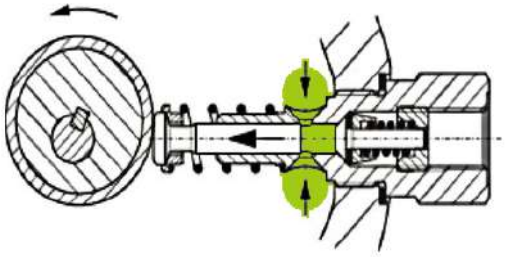
■ IBX Pump Element

Product Description

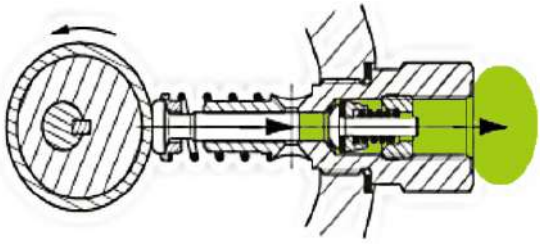
The IBX series pump elements are all plunger-type part which are driven by spring reset. The pump element has two kinds of available displacements. It's designed with a simple structure and easy to install and replace.

The adjustable pump element is a specially designed pump element that can adjust the grease output by adjusting the screw. It can conveniently adjust the grease output during the operation of the lubrication system to meet lubrication needs.

✧ Work Principle



Suction phase



Delivery phase

✧ Technical Data

Model	*Type*	*Reset Force*	*Displacement (cm^3/min)*	*Max. Working Pressure (bar)*	*Mounting Thread*	*Outlet*	*Miscellaneous*
IBX-3E	Normal	Spring	3.3	350	M20x1.5	G 1/4	/
IBX-4E	Normal	Spring	6.0	350	M20x1.5	G 1/4	/
IBX-4A	Adjustable	Spring	1.3 ~ 6.2	350	M20x1.5	Ferrule connector of Ø6	Safety valve integrated

■ SV Safety Valve

✧ Product Description

The safety valve is directly installed at the pump element outlet to protect the entire lubrication system from excessive pressure. The opening pressure of the safety valve is 350 bar, and the outlet pipe diameter is available in three specifications: Ø6, Ø8, and Ø10.

✧ Technical Data

Model	*Relief Pressure (bar)*	*Ferrule Connector (Outlet)*	*Mounting Thread (24^o cone nut)*	*Relief Port Thread*
SV-35-06	350	Ø6	M14x1.5	G 1/8
SV-35-08	350	Ø8	M14x1.5	G 1/8
SV-35-10	350	Ø10	M18x1.5	G 1/8

■ PFB Progressive Divider

✧ Product Description

The PFB series progressive divider has a block-type integrated structure. The displacement at each outlet of the divider is fixed and uniform, at 0.2 cm3/stroke, with a max. working pressure of 350 bar. Each divider block has a minimum of 6 outlets and a maximum of 22 outlets, allowing users to choose a divider with an appropriate number of outlets based on actual lubrication needs.

✧ Outlet Fitting

Due to the interconnected internal machined channels, the outlet fittings of the PFB block-type divider cannot use standard fittings and require specially customized fittings. The outlet pipe diameter is Ø6 mm, and the specific order models are as follows:

Model	*Type*	*Tube*	*Thread*	*Picture*
37-2005-001	Ferrule connector	Ø6	M10x1	
32-4003-001	Push-in connector	Ø4	M10x1	
32-4003-004	Push-in connector	Ø6	M10x1	

■ PFB Progressive Divider Part Number

■ PFM Progressive Divider

✧ Product Description

The PFM series progressive divider has a modular structure, with each block locked together by fastening bolts. The PFM divider consists of three parts: a head block, several intermediate blocks and an end block. The head block and end block are standard configurations, while all intermediate blocks are metering blocks, which can be freely selected and combined as needed.

However, the total number of metering blocks must be at least 3 (for 6 outlets) and no more than 10 (for 20 outlets). The PFM divider is available in 8 displacements with a maximum operating pressure of 250 bar.

■ PFM Progressive Divider Part Number

PFM - 4/6 - 06S/12S/20T/24T - E

PFM series progressive divider

Quantity of metering blocks / outlet
X / Y: X metering blocks / Y outlets
X: Any number between 3 and 10
Y: Any number between 1 and 20

Metering blocks model [1)]

06T: 2 outlets and 0.06 cm^3/stroke/outlet	06S: 1 outlet and 0.12 cm^3/stroke/outlet
12T: 2 outlets and 0.12 cm^3/stroke/outlet	12S: 1 outlet and 0.24 cm^3/stroke/outlet
20T: 2 outlets and 0.20 cm^3/stroke/outlet	20S: 1 outlet and 0.40 cm^3/stroke/outlet
24T: 2 outlets and 0.24 cm^3/stroke/outlet	24S: 1 outlet and 0.48 cm^3/stroke/outlet

Blockage monitor [2)]
Blank: No
M: Visual indicator
E: Piston detector, DC 24V, PNP NO
EV: Piston detector, DC 24V, PNP NO, with 5m cable

1) When selecting the metering blocks, the first one is the one after head block and others are selected in sequence.

2) “M” is available only when selecting any one metering block of “20T”, “20S”, “24T” and “24S”.

■ PFM Progressive Divider Dimension

PFM-10/ -...	202.7	217.2

■ PFMS Progressive Divider

✧ Product Description

The PFMS series progressive divider has a modular structure, with each block locked together by fastening bolts. Its dimensions are smaller than PFM dividers. The PFMS divider consists of three parts: a head block, several intermediate blocks and an end block. The head block is standard configurations, while all end block and intermediate blocks are metering blocks, which can be freely selected and combined as needed.

However, the total number of metering blocks must be at least 3 (for 6 outlets) and no more than 10 (for 20 outlets). The PFMS divider is available in 6 displacements with a maximum operating pressure of 250 bar.

■ PFMS Progressive Divider Part Number

■ PFG Progressive Divider

✧ Product Description

The PFG series progressive divider has a modular structure, with each block locked together by fastening bolts. Its dimensions are much bigger than PFM & PFMS dividers. The PFG divider consists of four parts: a head block, several intermediate blocks, several metering blocks and an end block. The head block, intermediate block and end block are standard configurations, while selecting different metering blocks. It can be freely selected and combined as needed. However, the total number of metering blocks must be at least 3 (for 6 outlets) and no more than 10 (for 20 outlets). The PFG divider is available in 16 displacements with a maximum operating pressure of 250 bar.
